1/72 Geschütz zum
Größervergleich

1/72 cannon to show the scale

1. The carriers are thought to be put on a table to carry regiment-cards and markers for morale, or other properties used in a table-top game.
2. To use the ones with holes instead of pin, put 25mm-30mm round wood with diameter 4mm into its holes. This solution is the more robust one if you got some issues with printing.
3. there are two sizes of washer matching to the carriers : thickness of 2mm for single count, of 4mm for multiple count. I used a light blue for single, silver for multiple – but of course this is at the option of the user
4. Use the Microsoft PowerPoint templates to print for each unit a card representing it. It is recommended to print them on paper weight > 120g . Fold them in the middle and glue both sides together

wenn auf einem metallischen oder mit Ferrit-Farbe angemalten Tischeingesteckt :einkleben
8x2mm Neodyn oder Magnetband

if used on a metallic or ferrit coloured table: to
glue a 8x2mm Neodyn or magnetic tape

Zählscheibchen
/ washer
4,6mm x2mm

count 1

Zählscheibchen
/ washer
4,6mm x4mm

count 4 (or as desired)
